

MIYAZAWA

MIA®

You strive for perf

Every Miyazawa flute is a fusion of time-tested traditional techniques and groundbreaking advancements, handcrafted to meet your highest expectations. Our consistent quality is matched by a commitment to choice. Your instrument will be customized to match your playing style. Play a Miyazawa and feel the freedom to communicate your natural musical voice.

Miyazawa is more than a flute, it's a community. You'll find Miyazawa flutists wherever you play—throughout the world and close to home. They are proud to play a Miyazawa and we are proud to welcome them into our community. Join us online at www.miyazawa.de to celebrate their achievements.

ection. So do we.

Alto Flutes

The Miyazawa handcrafted alto flute combines an exceptionally responsive headjoint with keys spaced for optimal comfort and effortless performance. Grenadilla inserts on the contact point of every key for enhanced security. Miyazawa alto flute is the choice of professional symphony players worldwide.

At Miyazawa we are devoted to the details.

For your best performance, you demand a lot from yourself. Don't settle for any less from your flutemaker. Every Miyazawa flute is meticulously handcrafted to meet our exacting standards and your precise needs.

Choose with confidence when you choose Miyazawa. Customize your sound and response with the industry's most comprehensive selection of metals and headjoint styles. Select a headjoint as unique as you are and rest assured you will be getting an instrument rich with tonal colors and dynamic in its responsiveness. For the most personal element of your flute, the power of choice is truly yours.

You'll find quality in every aspect of a Miyazawa flute including these notable advancements:

- the pinless left hand mechanism, partial Brögger System™ and the Brögger System™ for more stable adjustments and the elimination of binding from traditional pinned mechanisms,
- cold-forged keys—much stronger and more reliable than keys created through outdated heat-casting methods which compromise metal integrity,
- flat-bottom key cups, providing a superior, consistent surface where pads are seated, designed specifically for Straubinger Pads. Not all flute mechanisms have the precision to benefit from these advanced pads—Miyazawa does.

A man with short grey hair, wearing a dark brown blazer over a light green t-shirt, white trousers, and brown loafers, is sitting on a wooden chair. He is holding a gold flute across his lap. To his right, on the floor, is an open brown flute case with a red interior. The background is plain white.

Elevate your
performance
with Miyazawa's
EXCLUSIVE
Brögger System™

You're looking for an edge. Find it with Miyazawa's exclusive Brögger System™. Designed by famed flutemaker Johan Brögger, the Brögger System™ features an innovative pinless mechanism allowing precise adjustments and spring tension balance of each individual key, resulting in a more even, effortless feel for the flutist. The elimination of pins reduces friction and wear between moving parts. A sleek one-piece rod and kicker construction creates a stronger, more stable and precise mechanism.

You'll find comfort with a Miyazawa. Ergonomically designed for a natural fit in the flutist's hand, the Brögger Thumb Key Mechanism™ reduces hand fatigue. The relocated thumb-key post enables smoother, more secure playing. Traditional thumb key mechanisms require flat springs which contact the body tubing of the flute causing friction and wear. The innovative Brögger Thumb Key Mechanism™ uses the same springs found on the mainline keys, significantly reducing wear.

The Brögger System™ advances centuries of flute design, creating faster, more responsive key action and incredibly smooth mechanical function, letting your natural abilities shine through.

Your flute is a reflecti

You won't settle for just any flute, you need the right flute. A Miyazawa can be tailored to your precise needs. Make your flute an extension of your voice with any of these enhancements.

C Footjoint

Inline G Keys

C# Trill

B Footjoint

Choice of low C or low B footjoint on every model. The high C facilitator "gizmo" is standard on each Miyazawa B footjoint.

Offset G Keys

Personalize the fit of your flute for the most comfortable left wrist and hand position with no pitch or tonal differences.

The versatile C# trill key simplifies many awkward trill and tremolo fingerings and dramatically improves pitch and clarity when playing open C#.

C# and D# Rollers

Facilitate movement between the C# and D# keys of the footjoint, an often challenging area for even the most accomplished flutists.

E Mechanism

This mechanism ensures tonal stability of the high E, secure attacks and smooth slurs between the third octave A and E.

High E Facilitator

An effective, economical alternative to the split E, the facilitator improves the response of the flute's high E without adversely affecting other notes.

Ornamental Engraving

Elegant and refined, ornamental engraving enhances the beauty of the instrument and is available on the lip plate, mechanism, crown and rings.

on of you.
